ABSTRACT

This bibliography contains 140 citations (some with annotations) for selected rural education literature entered into the AGRICOLA database between January 1979 and September 1991. The publications, all in English, include books, commission papers, journal articles, legal documents, reports, academic theses, and audiovisual materials. Each entry contains information on title, author, publisher, date and place of publication, and the call number of the National Agricultural Library. Topics related to rural education include: (1) alcohol and drug use; (2) education reform; (3) rural development; (4) economic development; (5) characteristics of rural youth and rural schools; (6) educational and occupational aspirations of rural youth; (7) community education; (8) vocational education; (9) school finance; and (10) higher education. The document includes information about document delivery services provided by the National Agricultural Library to individuals and libraries. It also contains a description of the Rural Information Center, which provides information and referral services to local government officials, community organizations, health professionals and organizations, cooperatives, libraries, and rural citizens. Bibliographies in the Quick Bibliography Series of the National Agricultural Library, are intended primarily for current awareness, and as the title of the series implies, are not indepth exhaustive bibliographies on any given subject. However, the citations are a substantial resource for recent investigations on a given topic. They also serve the purpose of bringing the literature of agriculture to the interested user who, in many cases, could not access it by any other means. The bibliographies are derived from computerized on-line searches of the AGRICOLA data base. Timeliness of topic and evidence of extensive interest are the selection criteria.

The author/searcher determines the purpose, length, and search strategy of the Quick Bibliography. Information regarding these is available upon request from the author/searcher

Copies of this bibliography may be made or used for distribution without prior approval. The inclusion or omission of a particular publication or citation may not be construed as endorsement or disapproval.

To request a copy of a bibliography in this series, send the title, series number and self-addressed gummed label to:

Document Delivery Services to Individuals

The National Agricultural Library (NAL) supplies agricultural materials not found elsewhere to other libraries.

Filling requests for materials readily available from other sources diverts NAL's resources and diminishes its ability to serve as a national source for agricultural and agriculturally related materials. Therefore, NAL is viewed as a library of last resort. Submit requests first to local or state library sources prior to sending to NAL. In the United States, possible sources are public libraries, land-grant university or other large research libraries within a state. In other countries submit requests through major university, national, or provincial institutions.

If the needed publications are not available from these sources, submit requests to NAL with a statement indicating their non-availability. Submit one request per page following the instructions for libraries below.

NAL's Document Delivery Service Information for the Library

The following information is provided to assist your librarian in obtaining the required materials.

Loan Service – Materials in NAL's collection are loaned only to other U.S. libraries. Requests for loans are made through local public, academic, or special libraries.

The following materials are not available for loan: serials (except USDA serials); rare, reference, and reserve books; microforms; and proceedings of conferences or symposia. Photocopy or microform of non-circulating publications may be purchased as described below.

Document Delivery Service – Photocopies of articles are available for a fee. Make requests through local public, academic, or special libraries. The library will submit a separate interlibrary loan form for each article or item requested. If the citation is from an NAL database (CAIN/AGRICOLA, *Bibliography of Agriculture,* or the NAL Catalog) and the call number is given, put that call number in the proper block on the request form. Willingness to pay charges must be indicated on the form. Include compliance with copyright law or a statement that the article is for "research purposes only" on the interlibrary loan form or letter. Requests cannot be processed without these statements.

Charges:

- Photocopy, hard copy of microfilm and microfiche – $5.00 for the first 10 pages or fraction copied from a single article or publication. $3.00 for each additional 10 pages or fraction.
- Duplication of NAL-owned microfilm – $10.00 per reel.
- Duplication of NAL-owned microfiche – $ 5.00 for the first fiche and $ .50 for each additional fiche per title.

Billing – Charges include postage and handling, and are subject to change. Invoices are issued quarterly by the National Technical Information Service (NTIS), 5285 Port Royal Road, Springfield, VA 22161. Establishing a deposit account with NTIS is encouraged. *DO NOT SEND PREPAYMENT.*

Send Requests to:

USDA, National Agricultural Library
Document Delivery Services Branch, 6th Fl.
10301 Baltimore Blvd.
Beltsville, Maryland 20705-2351

Contact the Head, Document Delivery Services Branch in writing or by calling (301) 344-3755 with questions or comments about this policy.

ELECTRONIC MAIL ACCESS FOR INTERLIBRARY LOAN (ILL) REQUESTS

The National Agricultural Library (NAL), Document Delivery Services Branch accepts ILL requests from libraries via several electronic services. All requests must comply with established routing and referral policies and procedures. The transmitting library will pay all fees incurred during the creation of requests and communication with NAL. A sample format for ILL requests is printed below along with a list of the required data/format elements.

National Agricultural Library
U.S. Department of Agriculture
Beltsville, Maryland 20705

The **Rural Information Center** (RIC) is a joint project of the Extension Service and the National Agricultural Library (NAL). RIC provides information and referral services to local government officials, community organizations, health professionals and organizations, cooperatives, libraries, businesses, and rural citizens working to maintain the vitality of America's rural areas. The Center combines the technical, subject-matter expertise of Extension's nationwide educational network with the information specialists and resources of the world's foremost agricultural library.

The Office of Rural Health Policy in the Department of Health and Human Services (DHHS) and the NAL jointly created a Rural Information Center Health Service (RICHS) as part of the RIC. RICHS collects and disseminates information on rural health issues, research findings related to rural health, and innovative approaches to the delivery of rural health care services.

SERVICES:

Provide customized information products to specific inquiries including assistance in economic revitalization issues; local government planning projects; rural health issues; funding sources; and other related issues for the purpose of monitoring the quality of rural life.

Process a broad array of general and funding information requests on such topics as:

- Successful strategies, models, and case studies of community development projects
- Small business attraction, retention, and expansion
- Tourism promotion and development
- Recycling programs
- Community water quality
- Technology transfer to rural areas
- Closure, restructuring and diversification of rural hospitals and clinics
- Agricultural health and safety
- Health programs, services, personnel issues
- State initiatives concerning rural health delivery issues

Refer users to organizations or experts in the field who can provide additional information.

Perform brief database searches of requested topics on a complimentary basis.

Furnish bibliographies and Rural Information Center Publication Series titles.

Identify current USDA and DHHS research and Cooperative Extension Systems programs.

4 NAL Call No: HD1411.O3
An assessment of the influence of peer association and identification on drug use among rural high school students.
Napier, T.L.; Goe, R.; Bachtel, D.C.
Columbus : The Department; Feb 1983.
ESO - Ohio State University, Dept. of Agricultural Economics and Rural Sociology (981): 27 p.; Feb 1983. Includes 44 references.

Language: English

Descriptors: Georgia; Rural sociology; Statistical analysis; Rural values; Students; Adolescents

Abstract: Extract: Data were collected on 1981 from 4,859 junior and senior high school students living in two counties in southern Georgia to examine the relationship of peer group influence and psychosocial identification with the frequency of drug use. Practically all of the students in grades 8 through 12 in two study counties were interviewed in controlled group sessions during regularly scheduled school hours. All of the interviews were conducted simultaneously in each selected school to prevent biasing of responses due to the diffusion of study contents among student participants. Information regarding the type and extent of drug use was collected from the students as well as peer group relationships and psychosocial identification with various groups. These data provided the opporunity to examine the merits of a theoretical perspective developed from selected components of differential association and differential identification theories.

Public health reports v. 103 (4): p. 394-399; 1988 Jul. Includes references.

Language: English

Descriptors: Maryland; Rural youth; Adolescents; Substance abuse; Counties; Tobacco smoking; Alcoholic beverages; Health

Abstract: We examined the relationship between the drug use by young adolescents and two indicators of illness, frequency of illness and numbers of days absent from school owing to illness. Data were from a general health survey of all eighth grade students enrolled in public schools in two rural Maryland counties. A total of 745 students completed a self-administered questionnaire during school hours in January 1984. Information was obtained on a variety of sociodemographic characteristics and on the students' use of tobacco, alcohol, and marijuana. Correlational analyses were used to examine the relationships among cigarette smoking, beer or wine drinking, whiskey or hard liquor drinking, and marijuana use. Logistic regression was used to model the effects of drug use behaviors on the likelihood of being absent from school 3 or more days, adjusting for the student's age, sex, race, parents' education, illness frequency, and concerns about learning problems in school. We found substantial covariation among the use of cigarettes, alcohol, and marijuana. After adjusting for the background variables of illness, frequency, and learning problems, we found that students who are frequent cigarette smokers expe-

BEST COPY AVAILABLE

rienced a 2.6 risk of school absenteeism. Other drug use behaviors were not associated significantly with increased risk of missing school. Findings are discussed within the context of health-related consequences of drug use.

Descriptors: Pennsylvania; Rural; Schools; Population; Growth; Education; Financing; Statistical data

Abstract: Extract: The overall objective of this paper is to provide a base for further research on problems and issues in rural school finance by examining Pennsylvania's rural school districts. Our specific objectives are threefold. First, we summarize briefly previous research on enrollment change between the 1970-71 and 1976-77 school years in Pennsylvania's urban and rural school districts. Second, enrollment change in these school districts is related to change in district fiscal characteristics. Third, we suggest some ideas for further research on the problems of financing rural school districts, especially in light of the enrollment changes occurring in these districts.

Descriptors: Michigan; Wisconsin; Substance abuse; Educational programs; Schools; Curriculum; Rural areas; Rural youth; Health; Beliefs; Behavior; Attitudes; Alcoholic beverages; Cocaine; Tobacco smoking

Abstract: The author examines the prevalence of drug use among 265 youth who reside in rural northern Michigan and northeastern Wisconsin. The study focuses on use of alcohol, cigarettes, marihuana and cocaine by students in sixth and seventh grade. The results of a comprehensive drug education program carried out at these grade levels is discussed. Students' health beliefs are also considered.

The impact of property tax relief on education in rural areas.
Debertin, D.L.; Clouser, R.L.; Pagoulatos, A.
Fargo : North Dakota State University; July 1984.
North Central journal of agricultural economics v. 6 (2): p. 1-11; July 1984. Includes 18 references.

Language: English

Descriptors: Impact; Property taxes; Education; Rural areas; Socioeconomic factors; Valuation; Models; Revenue; Public services

Abstract: Extract: This paper examines the differential impacts of property tax relief on rural, suburban and urban schools in Indiana. The property tax relief plan implemented in Indiana reduced the correlation between educational spending and assessed valuation when both are measured on a per pupil basis. Other socioeconomic variables, such as family income, continue to be important deteminants of spending levels in Indiana.

60 NAL Call No: HD1773.A3N6
Impacts of declining enrollments on educational expenditures in rural areas.
Debertin, D.L.; Pagoulatos, A.
Urbana, Ill., Illinois University. Dept. of Agricultural Economics; Jan 1980.
North Central journal of agricultural economics v. 2 (1): p. 25-30; Jan 1980. 9 ref.

Descriptors: Indiana; Schools; Funds; Students; Rural areas; Population change; Expenditures; State government; Regression analysis

Abstract: Extract: Results suggest that declining enrollments have led to increased per pupil expenditures in rural school districts. Increased costs are primarily due to decreases in pupil/teacher ratios. The state aid distribution formula in Indiana does a better job of compensating urban schools for these cost increases than it does for rural schools.

Language: English

Descriptors: Georgia; Schools; Rural areas; Students; Regression analysis; Drugs; Models

Abstract: Extract: Data focused on marijuana use were collected in 1981 from 4,859 high school students living in two counties in southern Georgia. The data were used to test a facilitative-constraint model developed from selected components of differential association, differential identification, and social control theories. Regression analysis was used to identify the factors that were predictive of frequency of marijuana use. Discriminant analysis was used to compare "users," "experimenters," and "nonusers" on the basis of factors chosen to represent each dimension of the theoretical perspective. The findings demonstrated that the theoretical model was useful in predicting the frequency of marijuana use and for correctly classifying students into appropriate user categories.
